Prepared in the Fisheries Department, FAO, on the basis of information available as of 31 December 1994.

Information from this publication may be quoted if reference is made to the source.

FAO provides times series of fishery statistical data in computer readable form to users of the FAO Yearbook of Fishery Statistics - Commodities. The time series are given as annual data for countries or area/species groups/major fishery commodities for a period of years starting with the year 1976 up to the latest year published.

Data can be provided on standard tapes (at a cost of US$100 or the equivalent in pounds sterling or French francs) or in PC version on floppy disks of either 3.5 or 5.25 inches (at a cost of US$70 or the equivalent in pounds sterling or French francs). Prices are subject to revision.

Inquiries about the technical contents of this publication and requests for the standard tapes should be addressed to:

*The Senior Fishery Statistician*
*Fishery Information, Data and Statistics Service*

Requests for floppy disks should also be sent to the above address.

Etabli par le Département des pêches de la FAO, sur la base des renseignements disponibles au 31 décembre 1994.

Il est possible de reproduire les articles et renseignements contenus dans cette publication sous réserve d'en indiquer la source.

La FAO met en vente des séries de données statistiques publiées dans l'Annuaire statistique des pêches - produits, pour ordinateur. Les séries chronologiques donnent des chiffres annuels par pays ou zones/groupes d'espèces/principaux produits des pêches, qui portent sur une période allant de l'année 1976 à la dernière année publiée dans l'Annuaire.

Les données sont disponibles sur bandes pour ordinateur (au prix unitaire de 100 dollars E.-U., ou l'équivalent en livres sterling ou francs français) ou bien en version PC sur disquettes de 3,5 ou 5,25 pouces (au prix de 70 dollars E.-U. ou l'équivalent en livres sterling ou francs français). Les prix peuvent être modifiés sans préavis.

## Introduction

1. This Volume of the **Yearbook of Fishery Statistics** presents the annual statistics on a world-wide basis, for a varying series of recent years ending in 1993, on the production and international trade of fishery commodities. Apparent consumption of fish and fishery products, introduced for the first time in Volume 55 with data for 1979-81, has been updated to give information relating to the average 1988-90. With Volume 65, a table on imports and exports by country, by seven fishery commodity groups, last published in Volume XIII, has been re-introduced. With Volume 75, a table on the value at first sale of landed catches by groups of species has been introduced.

2. The annual period used is the calendar year (1 January - 31 December ) with the exception of few countries or areas which use a split-year in their reporting procedures - see NOTES ON ANNUAL PERIODS.

3. Data on the quantities of fishery commodities produced and on imports and exports, are expressed in metric tons and refer to the net weight of the commodities. The values in international trade tabulations are expressed in thousands of US dollars.

4. The tables are derived from FAO's computerized fishery commodities database, which has been expanded and at present covers data for the years 1976-93.

5. FAO's International Standard Statistical Classification of Fishery Commodities (ISSCFC), has been used for collation of national details and thus in the layout of the tables. ISSCFC is derived from the United Nations Standard International Trade Classification, Revision 3 (SITC Rev.3), as harmonized with the Nomenclature for the Classification of Goods in Customs Tariffs (Harmonized System), of the World Customs Organization. These commodity categories cover products derived from fish, crustaceans, molluscs and other aquatic animals and residues caught for commercial, industrial or subsistence uses, by all types of classes of fishing units operating in inland, fresh and brackish waters, in inshore, offshore or high seas fishing areas. The tables also include commodities produced from the raw materials supplied by all kinds of fish-farming.

6. Where necessary, the data for 1976-92 published in the preceding volumes of the **Yearbook of Fishery Statistics** have been revised. Where figures in this volume differ from those previously published, the amended data represent the most recent version. Some statistics provided to FAO by national offices, in particular those for 1993, are provisional and may be amended in future volumes, and in other FAO publications.

7. To facilitate use of the **Yearbook**, a series of notes and lists are included.

8. As usual, government officers and staff of international organizations have made possible the timely publication of this **Yearbook** by their prompt attention to our requests and the care they devoted to checking material submitted to them. FAO expresses its thanks to them and welcomes the support of national and international organizations and of interested individuals in improving the scope and accuracy of the **Yearbook**.

## Introduction

Dans ce volume de l'**Annuaire statistique des pêches** figurent, sur une base mondiale pour diverses périodes récentes prenant fin en 1993, les statistiques annuelles sur la production et le commerce international des produits de la pêche. La consommation apparente de poisson et les produits de la pêche, incluse pour la première fois dans le Volume 55 pour la période 1979-81, a été mise à jour et fournit l'information relative à la moyenne 1988-90. A partir du volume 65, on a re-introduit un tableau, publié pour la dernière fois dans le Volume XIII, sur les importations et exportations par pays et par sept groupes de produits de la pêche. A partir du Volume 75, on a introduit un tableau sur la valeur à la première vente des captures débarquées par groupes d'espèces.

La période annuelle utilisée est l'année civile (1er janvier - 31 décembre), sauf pour quelques pays ou zones qui utilisent l'année fractionnée dans leurs rapports - voir les NOTES SUR LES PERIODES ANNUELLES.

Les données quantitatives relatives aux produits de la pêche ainsi qu'aux importations et exportations sont exprimées en tonnes et se réfèrent au poids net des produits. Dans les tableaux relatifs au commerce international, les valeurs sont exprimées en milliers de dollars E.U.

Les tableaux sont établis d'après la base de données informatisée préparée par la FAO pour ces produits; cette base de données a été élargie et actuellement couvre les années 1976-93.

La Classification statistique internationale type des produits de la pêche de la FAO (CSITPP) a été utilisée pour collationner les renseignements détaillés par pays ou zones et préparer les tableaux. La CSITPP découle de la Classification type pour le commerce international, Révision 3, des Nations Unies (CTCI, Rev.3) qui a été harmonisée avec la Nomenclature pour la classification des marchandises dans les tarifs douaniers (Système harmonisé) de l'Organisation mondiale des douanes. Ces catégories de produits couvrent les produits dérivés du poisson, des crustacés, des mollusques et d'autres animaux et résidus aquatiques capturés à des fins commerciales, industrielles ou de subsistance, par tous les types d'unités de pêche qui opèrent dans les eaux intérieures douces et saumâtres, dans les zones de pêche côtières, littorales et hauturières. Les tableaux comprennent également les produits obtenus à partir des matières premières fournies par tous les type de pisciculture.

Le cas échéant, les données relatives aux années 1976-92 publiées dans les volumes précédents de l'**Annuaire statistique des pêches** ont été révisées. Lorsque les chiffres indiqués dans le présent volume diffèrent de ceux déjà publiés, les données modifiées représentent la version la plus récente. Certaines statistiques communiquées à la FAO par les services nationaux sont provisoires, notamment pour 1993, et pourront être modifiées dans les futurs volumes, ainsi que dans d'autres publications de la FAO.

Pour faciliter l'emploi de l'**Annuaire**, on a introduit une série de notes et de listes.

Comme de coutume, c'est grâce à la rapidité et au soin avec lesquels les fonctionnaires des services publics et le personnel des organisations internationales ont répondu à nos demandes et vérifié les matériaux qui leur étaient soumis que cet **Annuaire** a pu être publié en temps voulu. La FAO tient à les remercier et se félicite de l'aide que lui apportent les organisations tant nationales qu'internationales et les personnes intéressées, afin d'améliorer l'étendue et la précision de l'**Annuaire**.

## Introducción

En el presente volumen del **Anuario Estadístico de Pesca** se presentan las estadísticas anuales mundiales, correspondientes a una serie de diversos años recientes que terminan con 1993, sobre la producción y el comercio internacional de productos pesqueros. El consumo aparante de pescado y productos de la pesca, incluido por primera vez en el Volumen 55 para el período 1979-81, ha sido actualizado para proveer información sobre el período 1988-90. Desde el Volumen 65, se ha introducido de nuevo un cuadro, publicado por última vez en el Volumen XIII, sobre importaciones y exportaciones por países y por siete grupos de productos pesqueros. Desde el Volumen 75, se ha introducido un cuadro sobre el valor en primera venta de las capturas desembarcadas por grupos de especies.

El período anual utilizado es el año civil (1 de enero - 31 de diciembre), salvo para unos pocos países o áreas que utilizan en sus informes el año emergente. Véase las NOTAS SOBRE LOS PERIODOS ANUALES.

El peso neto de las cantidades de los productos pesqueros producidos, así como de las importaciones y exportaciones a que se refieren los datos, se expresa en toneladas métricas. Los valores de las tabulaciones del comercio internacional se expresan en millares de dólares estadounidenses.

Para los cuadros se utiliza la base de datos sobre productos pesqueros de la FAO, establecida mediante computadoras, que ha sido ampliada y actualmente abarca datos correspondientes a los años 1976-93.

Para cotejar los detalles de cada país y, por consiguiente, para la configuración de los cuadros, se ha utilizado la Clasificación Estadística Internacional Uniforme para los Productos Pesqueros de la FAO (CEIUPP), que está basada en la Clasificación Uniforme para el Comercio Internacional, Revisión 3, de las Naciones Unidas (CUCI, Rev.3) armonizada con la Nomenclatura para la Clasificación de Mercancía en los Aranceles de Aduanas (Sistema Armonizado) de l'Organización Mundial de Aduanas. En estas categorías de productos se incluyen los productos derivados de los peces, crustáceos, moluscos y otros animales y residuos acuáticos capturados para usos comerciales, industriales o de subsistencia, por unidades de pesca de todos los tipos y categorías, en aguas continentales, dulces o salobres, y en áreas de pesca de bajura, media altura o altura. En los cuadros se incluyen también los productos obtenidos con las materias primas proporcionadas por todas las clases de producción de la piscicultura.

Siempre que ha sido necesario, se han revisado los datos correspondientes a 1976-92 publicados en volúmenes anteriores del **Anuario Estadístico de Pesca**. Cuando las cifras que aparecen en este volumen difieren de las publicadas anteriormente, los nuevos datos representan la última versión disponible. Algunas estadísticas facilitadas a la FAO por las oficinas nacionales, en particular las correspondientes a 1993, son provisionales y podrán modificarse en volúmenes futuros y en otras publicaciones de la FAO.

Para facilitar la consulta del **Anuario** se incluyen una serie de notas y listas.

Igual que en ocasiones anteriores, la pronta publicación de este **Anuario** ha sido posible gracias a la colaboración de funcionarios estatales y de organizaciones internacionales que han respondido con prontitud a nuestras peticiones y han controlado con atención el material que se les ha presentado. La FAO desea manifestar a todos ellos su reconocimiento y agradece ya desde ahora la ayuda que organizaciones nacionales e internacionales o personas privadas le presten para mejorar el alcance y exactitud de este **Anuario**.

## General Notes

### NOTES ON ANNUAL PERIODS

In all tables data refer to the *calendar year* except for the following countries which report data on a *split-year* basis as indicated:

| | |
|---|---|
| AUSTRALIA | Year ending 30 June |
| BANGLADESH | Year ending 30 June |
| HAITI | Year ending 30 September |
| IRAN I R | Year beginning 20-23 March |
| MICRONESIA | Year ending 30 September |
| PALAU | Year ending 30 September |
| ST HELENA | Year ending 31 March |

Where data for split-years are tabulated together with data on a calendar year basis, those for split-years are shown under the calendar years in which the split-years end.

### SYSTEMS OF TRADE

Two systems of recording trade are in common use, differing mainly in the way warehoused and re-exported goods are recorded: special trade and general trade.

a) **Special trade** is a system of recording imports for domestic consumption on the one hand and exports of domestic goods on the other.

Special imports include goods for domestic consumption and withdrawals from bonded warehouses or free zones for purposes of domestic consumption.

Special exports comprise exports of goods wholly or partially produced or manufactured in the country, together with exports of 'nationalized goods', but not of goods held in bonded warehouses or free zones.

b) **General trade** is a system which records total imports and total exports including re-exports. General imports consist of all imports into a country, including goods for domestic consumption and imports into bonded warehouses or free zones.

General exports consist of the combined total of national exports and re-exports. Re-exports, in the general trade system, consist of the outward movement of nationalized goods plus goods which, after importation, move outward from bonded warehouses or free zones without having been transformed.

Export and import data in this **Yearbook** relate to **general trade** for all countries except those named below, which report on the basis of special trade:

## Notes générales

### NOTES SUR LES PERIODES ANNUELLES

Dans tous les tableaux les données ont trait à l'*année civile* sauf pour les pays suivants qui utilisent l'*année fractionnée* de la façon indiquée ci-dessous:

| | |
|---|---|
| Année finissant le 30 juin | |
| Année finissant le 30 juin | |
| Année finissant le 30 septembre | |
| Année commençant le 20-23 mars | |
| Année finissant le 30 septembre | |
| Année finissant le 30 septembre | |
| Année finissant le 31 mars | |

Dans les tableaux qui comportent des données relatives à des années civiles et d'autres relatives à des années fractionnées, ces dernières figurent sous le millésime de la fin de la campagne.

### CATEGORIES DE COMMERCE

On utilise couramment deux systèmes pour enregistrer les échanges: commerce spécial et commerce général, qui diffèrent essentiellement par le mode de comptabilisation des marchandises entreposées et réexportées.

a) Par **commerce spécial**, on entend le système qui consiste à comptabiliser d'une part les importations destinées à la consommation intérieure et d'autre part les exportations de produits nationaux.

Au chapitre importations spéciales figurent les produits destinés à la consommation intérieure et les produits retirés aux mêmes fins d'entrepôts en douane ou de zones franches.

Au chapitre exportations spéciales figurent les articles entièrement ou partiellement produits ou manufacturés dans les pays, ainsi que les articles 'naturalisés', mais non les marchandises détenues dans des entrepôts en douane ou en zones franches.

b) Par **commerce général**, on entend le système qui consiste à comptabiliser toutes les importations et toutes les exportations, y compris les réexportations. Au chapitre importations figurent tous les produits importés dans un pays, y compris les marchandises destinées à la consommation intérieure et les importations détenues dans des entrepôts en douane ou en zones franches.

Au chapitre exportations figure le total global des exportations nationales et des réexportations. Dans le système du commerce général figurent les articles nationalisés qui sont envoyés à l'étranger, ainsi que les marchandises qui, après importation, sont retirées des entrepôts en douane ou des zones franches pour aller à l'étranger sans avoir été transformées.

Les données relatives aux exportations et aux importations qui figurent dans le présent **Annuaire** ont trait au **commerce général** pour tous les pays, sauf pour les pays ou zones suivants dont les rapports sont fondés sur le commerce spécial.

## Notas generales

### NOTAS SOBRE LOS PERIODOS ANUALES

En todos los cuadros los datos se refieren al *año civil*, excepto en el caso de los países siguientes que utilizan el *año emergente* como indicado a continuación:

| | |
|---|---|
| Año que termina el 30 de junio | |
| Año que termina el 30 de junio | |
| Año que termina el 30 de septiembre | |
| Año que comienza el 20-23 de marzo | |
| Año que termina el 30 de septiembre | |
| Año que termina el 30 de septiembre | |
| Año que termina el 31 de marzo | |

Cuando los datos correspondientes a años emergentes aparecen en los cuadros junto con los de años civiles, los relativos a los años emergentes figuran en el año civil en que termina el año emergente.

### SISTEMAS DE COMERCIO

En general, los sistemas que se utilizan para registrar los datos de comercio son dos: comercio especial y comercio general, que difieren principalmente por la manera de considerar los productos almacenados y reexportados.

a) En el sistema de **comercio especial** se tienen en cuenta, por un lado, las importaciones destinadas al consumo interior y, por otro, las exportaciones de productos interiores.

Las importaciones especiales incluyen los productos destinados al consumo interior y los retirados, para el mismo fin, de depósitos de aduanas o zonas francas.

Las exportaciones especiales comprenden las exportaciones de productos producidos o manufacturados total o parcialmente en el país y las exportaciones de 'productos nacionalizados', pero no las de productos de depósitos de aduanas o zonas francas.

b) En el sistema de **comercio general** se tienen en cuenta las importaciones totales y las exportaciones totales, incluidas las reexportaciones. Las importaciones generales abarcan todas las importaciones hechas por un país, incluidos los productos para consumo interior y los destinados a depósitos de aduanas o zonas francas.

Las exportaciones generales comprenden el total global de las exportaciones y reexportaciones nacionales. En el sistema de comercio general, las reexportaciones abarcan los productos nacionalizados y los productos que, tras haber sido importados, salen de depósitos de aduanas o de zonas francas sin haber sido previamente transformados.

Los datos sobre exportación e importación que aparecen en este **Anuario** se refieren al **comercio general**, excepto en el caso de los países que se indican a continuación, cuyos datos se refieren al comercio especial:

## General Notes

### TOTALS

The summary trade tables indicate totals by continents, ecocomic classes and regions, obtained by adding up imports or exports of each country included in the various groups irrespective of origin or destination of the commodity. Consequently, these totals are by no means to be taken as net trade of the geographic or economic groups to which they refer.

Differences between figures given for total exports and total imports of any one commodity may be due to several factors,e.g. the time lapse between the dispatch of goods from the exporting country and their arrival in the importing country; the use of a different classification of the same product by different countries; or the fact that some countries supply trade data on general trade, while others give data on special trade.

### STATISTICAL TREATMENT OF FISH LANDINGS IN THE INTERNATIONAL TRADE

In accordance with the internationally recommended practice, import statistics include fish caught by foreign fishing craft, whether or not processed on board, landed in domestic ports; export statistics include fish caught by domestic fishing craft, whether or not processed on board, landed in foreign ports.

Exceptions are mentioned in the notes on individual countries or areas.

### VALUATION

In general exports values are f.o.b. and import values are c.i.f.

For the following countries or areas import and export values are both f.o.b.:

AUSTRALIA, BERMUDA, BULGARIA, CANADA, COOK IS, CZECHOSLOVAK, DOMINICAN RP, PAPUA N GUIN, PHILIPPINES, POLAND ♦, SOLOMON IS, SOUTH AFRICA, USSR, USA ◇, VENEZUELA, ZAMBIA, ZIMBABWE

◇ Up to 1988
♦ Up to 1991

### COVERAGE OF STATISTICS ON THE INTERNATIONAL TRADE IN FISHERY COMMODITIES

The statistics cover the quantities and values of annual imports and exports of seven principal fishery commodity groups, i.e.:

Fish, fresh, chilled or frozen;

Fish, dried, salted or smoked;

Crustaceans and molluscs, fresh, frozen, dried, salted, etc.;

Fish products and preparations, whether or not in airtight containers;

Crustacean and mollusc products and preparations, whether or not in airtight containers;

Oils and fats, crude or refined, of aquatic animal origin;

Meals, solubles and similar animal feedingstuffs, of aquatic animal origin.

## Notes générales

### TOTAUX

Les tableaux-résumés du commerce indiquent des totaux par continent, catégories économiques et régions, obtenus en ajoutant les importations ou les exportations de chacun des pays inclus dans les divers groupes, indépendamment de l'origine ou de la destination des marchandises. Ils ne doivent par conséquent être en aucune façon considérés comme indiquant le commerce net des groupes géographiques ou économiques auxquels ils se rapportent.

Les différences entre les chiffres se rapportant aux exportations totales et aux importations totales pour un produit quelconque peuvent être dues à plusieurs facteurs, à savoir: les laps de temps s'écoulant entre l'expédition des marchandises par le pays exportateur et leur arrivée dans le pays importateur; l'utilisation de classifications différentes pour le même produit selon les pays; le fait que certains pays fournissent des données sur le commerce qui ont trait au commerce général tandis que d'autres pays fournissent des données se rapportant au commerce spécial.

### TRAITEMENT STATISTIQUE DES DEBARQUEMENTS DE POISSON DANS LE COMMERCE INTERNATIONAL

Conformément aux usages recommandés au plan international, les statistiques des importations comprennent le poisson capturé par des navires de pêche étrangers, qu'il soit ou non traité à bord, et débarqué dans des ports nationaux; les statistiques des exportations comprennent le poisson capturé par des navires de pêche nationaux, qu'il soit ou non traité à bord, et débarqué dans des ports étrangers.

Les exceptions sont indiquées dans les notes relatives aux divers pays ou zones.

### EVALUATION

En général, les valeurs des exportations sont f.o.b. et les valeurs des importations sont c.a.f.

Les valeurs des importations comme celles des exportations sont f.o.b. pour les pays ou zones suivantes:

◇ Jusqu'en 1988
♦ Jusqu'en 1991

### PORTEE DES STATISTIQUES DU COMMERCE INTERNATIONAL DES PRODUITS DE LA PECHE

Les statistiques portent sur les quantités et valeurs des importations et exportations annuelles des sept principaux groupes de produits de la pêche, c'est-à-dire:

Poissons frais, réfrigérés ou congelés;

Poissons séchés, salés ou fumés;

Crustacés et mollusques frais, congelés, séchés, salés, etc.;

Produits de poissons et préparations, en récipients hermétiques ou non;

Produits de crustacés et mollusques et préparations, en récipients hermétiques ou non;

Huiles et graisses, brutes ou raffinées, provenant d'animaux aquatiques;

Farines, solubilisés et aliments similaires pour animaux, provenant d'animaux aquatiques.

## Notas generales

### TOTALES

Las tablas-resumen de comercio indican los totales por continente, clases económicas y regiones, obtenidos sumando las importaciones o exportaciones de cada uno de los países incluidos en los diversos grupos, prescindiendo del lugar de origen o de destino de los productos. Por consiguiente, es peciso tener en cuenta que estos totales de ninguna manera suponen el comercio neto de cada uno de los grupos geográficos o económicos a que se refieren.

Las diferencias entre los datos que se facilitan acerca del total de las exportaciones y los correspondientes al total de las importaciones respecto a cualquier producto pueden deberse a diversos factores, por ejemplo: al tiempo transcurrido entre el envío de mercancías del país exportador y su llegada al importador; al empleo de una clasificación diferente de las mismas mercancías en diversos países; o al hecho de que algunos países suministran datos sobre el comercio general, mientras que otros los facilitan acerca del comercio especial.

### TRATAMIENTO ESTADISTICO DE LOS DESEMBARQUES DE PESCADO EN EL COMERCIO INTERNACIONAL

De acuerdo con el sistema recomendado internacionalmente, las estadísticas de importación de un país o área incluyen el pescado capturado por embarcaciones pesqueras extranjeras que se desembarca en puertos de ese país o área, independientemente de que haya sido o no elaborado a bordo. Las estadísticas de exportación incluyen el pescado capturado por embarcaciones pesqueras nacionales que se desembarca en puertos extranjeros independientemente de que haya sido o no elaborado a bordo.

Las excepciones se indican en las notas sobre los distintos países o áreas.

### VALORIZACION

En general, el valor de las exportaciones se da f.o.b. y el de las importaciones, c.i.f.

Para los siguientes países o áreas, sin embargo, tanto los valores de importación como los de exportación son f.o.b.:

◇ Hasta 1988
♦ Hasta 1991

### COBERTURA DE LAS ESTADISTICAS SOBRE COMERCIO INTERNACIONAL DE PRODUCTOS PESQUEROS

Las estadísticas comprenden las cantidades y valores de las importaciones y exportaciones anuales de los productos incluidos en los siguientes siete grupos principales:

Pescado fresco, refrigerado o congelado;

Pescado seco, salado o ahumado;

Crustáceos y moluscos frescos, congelados, secos, salados, etc.,

Productos de pescado y preparados, estén o no envasados herméticamente;

Productos de crustáceos y moluscos y preparados, estén o no envasados herméticamente;

Aceites y grasas, en bruto o refinados, procedentes de animales acuáticos;

Harinas, solubles y alimentos similares para animales, procedentes de animales acuáticos.

## General Notes

### COVERAGE OF STATISTICS ON PRODUCTION OF PRESERVED AND PROCESSED FISHERY COMMODITIES

The data cover the quantities of preserved and processed fishery commodities produced from:

a) nominal catches of all aquatic animals (except the catches of all aquatic mammals and the production of all aquatic plants) taken for commercial, industrial and subsistence purposes, by all types of fishing units operating in freshwater and marine areas;

b) fish farming, shellfish culture, etc.;

c) imported raw materials.

The statistics include the output of processed commodities, produced on board factoryships and by fishermens' families as domestic activities, e.g. drying, salting, smoking, etc.

The statistics include also the preserved and processed fishery commodities produced on board domestic fish factoryships and fishing craft from the reporting country or area, even when landed directly in foreign ports. However, data do not include fishery commodities produced on board foreign fish factoryships or fishing craft and landed directly in domestic ports.

Production data for 'Fish, live, fresh or chilled', 'Live crustaceans', 'Live molluscs', 'Fresh unpeeled crustaceans' and 'Fresh unshucked molluscs' are not included in the tables of subsections B-1 and D-1 as these items cannot be considered to be either preserved or processed products.

## Notes générales

### PORTEE DES STATISTIQUES DE PRODUCTION DES PRODUITS DE LA PECHE CONSERVES ET TRAITES

Les données portent sur les quantités des produits de la pêche conservés et traités préparées à partir:

a) des captures nominales de tous les animaux aquatiques (à l'exception de captures de tous les mammifères aquatiques et de la production de toutes les plantes aquatiques) effectuées à des fins commerciales, industrielles et de subsistance par tous les types et catégories d'unités de pêche tant en mer qu'en eau douce.

b) des produits de la pisciculture, de la conchyliculture, etc.;

c) des matières premières importées.

Les statistiques comprennent les quantités de produits traités à bord des navires-usines et celles transformées par les familles de pêcheurs à titre d'activités domestiques (par exemple séchage, salaison, fumage, etc.).

Les statistiques comprennent aussi les produits fabriqués à bord des navires-usines et bateaux de pêche du pays ou zone déclarant, même si ces produits sont débarqués directement dans des ports étrangers. Par contre, la production intérieure ne comprend pas les livraisons directes de produits de la pêche conservés et traités effectuées par des navires-usines ou des bateaux de pêche étrangers qui débarquent leur production dans les ports du pays ou zone déclarant.

Les données de production relatives aux 'Poissons vivants, frais ou réfrigérés', 'Crustacés vivants', 'Mollusques vivants', 'Crustacés frais non décortiqués' et 'Mollusques frais non décoquillés' ne sont pas comprises dans les tableaux des sous-sections B-1 et D-1 parce que ces catégories ne peuvent pas être considérées comme produits conservés ou traités.

## Notas generales

### COBERTURA DE LAS ESTADISTICAS SOBRE PRODUCCION DE PRODUCTOS PESQUEROS CONSERVADOS Y ELABORADOS

Las estadísticas abarcan las cantidades de productos pesqueros conservados y elaborados obtenidas utilizando:

a) las capturas nominales de toda clase de animales acuáticos (excepto las capturas de todos los mamíferos acuáticos y la producción de todas las plantas acuáticas) efectuadas con fines comerciales, industriales y de subsistencia por todos tipos o categorías de unidades de pesca, en las aguas dulces y en áreas marinas;

b) la producción de la piscicultura, cría de mariscos, etc.;

c) las materias primas importadas.

Las crifras incluyen también las cantidades de productos conservados y elaborados obtenidas a bordo de buques-factoría y las cantidades producidas por las familias de los pescadores como actividad doméstica, por ejemplo, el secado, la salazón y el ahumado de pescado, etc.

Las estadísticas sobre productos pesqueros conservados y elaborados incluyen también los producidos a bordo de buques-factoría nacionales y de embarcaciones pesqueras del país o área informante, aun cuando sean desembarcados directamente en puertos extanjeros. Sin embargo, en la producción nacional no se incluyen las entregas directas de productos pesqueros conservados y elaborados realizados por buques-factoría o embarcaciones pesqueras extranjeras que descarguen su producción en puertos del país o área informante.

Los datos de producción relativos a los 'Peces vivos, frescos o refrigerados', 'Crustáceos vivos', 'Moluscos vivos', 'Crustáceos frescos sin pelar', y 'Moluscos frescos con concha' no están incluidos en los cuadros de las subsecciones B-1 y D-1 ya que estas partidas no pueden considerarse como correspondientes a productos elaborados y conservados.

## Notes on countries or areas

1. The designations employed and the presentation of material in this publication do not imply the expression of any opinion whatsoever on the part of the Food and Agriculture Organization of the United Nations concerning the legal status of any country, territory, city or area or of its authorities, or concerning the delimitation of its frontiers or boundaries.

2. The term *country or area* as used in the stubs and the column headings of the tables also covers territories, cities, land areas, as well as provinces, districts, enclaves, exclaves and other parts of territories or combinations of countries or areas such as economic or customs unions.

3. The designations *developed* and *developing* economies are intended for statistical convenience and do not necessarily express a judgement on the stage reached by a particular country or area in its development process.

4. In all tables a country or area entry is designated by a multilingual code of not more than twelve characters. This code is keyed in the LIST OF COUNTRIES OR AREAS to the other descriptors for each country or area entry - the names in English, French and Spanish, the ISO's 3-alpha and 2-alpha codes, the UN's three-digit numerical code, etc.

5. Country or area names and designations are subject to nationally announced changes. Name changes announced after 31 December 1994 have not necessarily been incorporated in this **Volume** but will be reflected in future ones.

6. Final data have been provided by many national offices; others submitted provisional figures only. Whenever national offices failed to report their annual statistics in time for publication, FAO, in the absence of other information, has generally used as production estimates the national figures available for the most recent years; and as trade estimates the returns of trading partners.

7. Where national figures in this **Volume** differ from those previously published by FAO, the most recently published data represent the latest revisions.

## Notes sur les pays ou zones

Les appellations employées dans cette publication et la présentation de données qui y figurent n'impliquent de la part de l'Organisation des Nations Unies pour l'alimentation et l'agriculture aucune prise de position quant au statut juridique des pays, territoires, villes ou zones, ou de leurs autorités, ni quant au tracé de leurs frontières ou limites.

Le terme *pays ou zone* employé dans les talons et les têtes de colonne des tableaux, doit s'entendre également des territoires, villes, zones terrestres, ainsi que des provinces, districts, enclaves, parties détachées d'un Etat, autres parties de territoires ou regroupements de pays ou zones, tels qu'unions économiques ou douanières.

Les appellations relatives aux économies *développées* et *en développement* sont utilisées pour des raisons de commodité statistique, et n'expriment pas nécessairement un jugement quant au niveau de développement atteint par tel ou tel pays ou zone.

Dans tous les tableaux, les entrées des pays ou zones sont désignées par un code multilingue n'excédant pas douze espaces typographiques. Dans la LISTE DES PAYS OU ZONES ce code est associé aux autres descripteurs, c'est-à-dire aux noms en anglais, français et espagnol, aux codes ISO alpha-3 et alpha-2, au code numérique à trois chiffres des Nations Unies, etc.

La liste des appellations des pays ou zones est sujette de temps à autre à des modifications annoncées par les pays ou zones. Les modifications de noms survenues après le 31 décembre 1994 n'ont pas toujours été incorporées dans le présent volume, mais il en sera tenu compte dans les futurs volumes.

De nombreux services nationaux ont commmuniqué des données définitives; d'autres n'ont fourni que des chiffres préliminaires. Chaque fois que les services nationaux n'ont pu déclarer leur statistiques annuelles en temps utile pour la publication, la FAO, en l'absence d'autres informations, a généralement utilisé, comme estimations de la production, les chiffres nationaux disponibles pour les années les plus récentes et, comme estimations du commerce, les renseignements fournis par les partenaires commerciaux des pays en question.

Lorsque les chiffres nationaux indiqués dans le présent Volume diffèrent de ceux déjà publiés par la FAO, les données publiées les plus récemment représentent les dernières révisions.

## Notas sobre los países o áreas

Las denominaciones empleadas en esta publicación y la forma en que aparecen presentados los datos que contiene no implican, de parte de la Organización de las Naciones Unidas para la Agricultura y la Alimentación, juicio alguno sobre la condición jurídica de países, territorios, ciudades o zonas, o de sus autoridades, ni respecto de la delimitación de sus fronteras o límites.

En los encabezamientos de las columnas o renglones de los cuadros, el término *país o área* puede referirse también a territorios, ciudades, zonas terrestres, provincias, distritos, enclaves, exclaves, otras partes de territorios o grupos de países o áreas, como uniones económicas o aduaneras.

Las denominaciones *desarrollada* y *en desarrollo* aplicadas a una economía se utilizan solamente por razones de conveniencia estadística y no equivalen necesariamente a un juicio sobre la fase que un país o área determinado ha alcanzado en su proceso de desarrollo.

En todos los cuadros, los países o áreas se indican con un código multilingue que no utiliza más de doce espacios. En la LISTA DE PAISES O AREAS dicho código aparece acompañado de otros descriptores - los nombres en inglés, francés y español, los códigos ISO alfa-3 y alfa-2, y el código numérico de tres dígitos de las Naciones Unidas, etc.

Los países o áreas anuncian en algunas ocasiones cambios de sus nombres y denominaciones. En el presente volumen no se han incorporado todos los cambios de nombres anunciados después del 31 de diciembre de 1994, pero se tendrán presentes en volúmenes futuros.

Muchas oficinas nacionales han facilitado datos definitivos; otras, en cambio, sólo han presentado cifras provisionales. Cuando las oficinas nacionales no han comunicado a tiempo sus estadísticas nacionales, la FAO, a falta de otra información, se ha servido en general, como estimaciones de la producción, de las cifras nacionales correspondientes a los últimos años; como estimaciones del comercio, del movimiento comercial de los países con quienes el país no informante comercia.

Cuando las cifras correspondientes a un país o área incluidas en este Volumen difieren de las publicadas anteriormente por la FAO, los últimos datos publicados representan la última revisión de dichas cifras.

A = FAO multilingual country or area code (maximum twelve characters) used for statistical purposes.

Noms de pays ou zones en code multilingue FAO (n'excédant pas douze lettres) utilisés à des fins statistiques.

Nombres multilingües de los países o áreas utilizados por la FAO para fines estadísticos (máximo, doce espacios).

B = Alpha-3 currency code: ISO (International Organization for Standardization).

Code Alpha-3 de monnaies: ISO (Organisation Internationale de Normalisation).

Código Alfa-3 de las monedas: ISO (Organización Internacional de Normalización).

C = Currency names in English

Noms de monnaies en anglais.

Nombres de las monedas en inglés.

This table presents average annual exchange rates used in converting national currencies into US dollars. In general, the exchange rates are supplied by the International Monetary Fund databank; in some cases data are drawn from national sources.

Ce tableau indique les taux de change moyens annuels utilisés pour convertir les monnaies nationales en dollars E.U. En général, les taux de change sont fournis par la banque de données du Fonds monétaire international; dans certains cas, les données proviennent de sources nationales.

Este cuadro indica los tipos promedios de cambio anuales utilizados para convertir monedas nacionales en dólares de los Estados Unidos. En general, los tipos de cambio son suministrados por el banco de datos del Fondo Monetario Internacional; en algunos casos, los datos se obtienen de fuentes nacionales.

Exchange rates for countries or areas providing value data directly in US dollars are not included.

Les taux de change des pays ou zones qui fournissent les données de valeur directement en dollars E.U. ne sont pas inclus.

Los tipos de cambio de los países o áreas que facilitan los datos de valor directamente en dólares EE.UU. no están incluidos.

NOTE

Total world catch excludes whales, seals, other aquatic mammals and aquatic plants.

(a) Only whole fish destined for the manufacture of oils and meals is included. Raw material for reduction derived from fish primarily destined for marketing fresh, freezing, curing, canning and miscellaneous purposes is excluded; such waste quantities are included under the other disposition channels.

NOTE

Le total mondial des captures ne comprend pas les baleines, phoques, autres mammifères aquatiques et plantes aquatiques.

(a) Y compris seulement du poisson entier destiné à la fabrication d'huile et de farines. La matière première destinée au traitement industriel et provenant de poissons essentiellement destinés à d'autres usages (marée fraîche, congélation, séchage, fumage, salaison, conserves, etc.) n'est pas comprise; ces quantités de déchets sont comprises dans les autres formes d'utilisation.

NOTA

En las capturas mundiales totales no están incluidas las ballenas, focas, otros mamíferos acuáticos y plantas acuáticas.

(a) Se incluye sólo el pescado entero destinado a la fabricación de aceite y harina. No se incluyen las materias primas para reducción procedentes de pescado destinado a la venta en fresco, congelado, curado y en conserva o a usos varios; esos desechos aparecen incluidos en las otras formas de utilización.

Due to difficulty in identifying raw material input, quantities shown for certain countries may include significant amounts of meal from non-oily fish.

Comme il est difficile d'identifier la matière première entrant dans le produit, les quantités indiquées pour certains pays peuvent englober d'importantes proportions de farine fabriquée à partir de poissons démersaux.

Debido a la dificultad de identificar la materia prima utilizada, los datos que aparecen para algunos países pueden incluir grandes cantidades de harina de pescado de fondo.

NOTE

Catch, trade and supply data refer to fish, crustaceans and molluscs, including all aquatic organisms except whales and seaweeds.

Information on changes in stocks is available for a limited number of countries only.

In view of possible distortions in each of the components of the commodity balances (i.e. in data for catch, trade and population) as well as in coefficients used to convert product weight to live weight equivalent, *per caput* consumption data should be regarded as giving only an order of magnitude indication of consumption levels. Comparison with data for previous periods published in earlier Yearbooks may not therefore give a valid indication of real changes in consumption.

The data shown in this table have been processed from the FAO's Agricultural Data Bank. They were calculated on the basis of information available in August 1994. Therefore, in certain instances some discrepancy may occur with catch and trade data published in the latest FAO Yearbooks of Fishery Statistics, which contain information made available to FAO more recently.

For detailed information on other food commodities and the role of fish in national diets see:

NOTE

Les données de captures, de commerce et de disponibilité se réfèrent à poissons, crustacés et mollusques, y compris tous les organismes aquatiques sauf baleines et algues.

La variation des stocks est disponible seulement pour un nombre limité de pays.

Compte tenu de distorsions qui peuvent affecter chacun des éléments des bilans par produit (c'est-à-dire les données concernant les captures, le commerce et la population) ainsi que les coefficients appliqués pour convertir le poids du produit en équivalent poids vif, les données concernant la consommation par habitant doivent être uniquement considérées comme un ordre de grandeur des niveaux de consommation. Pour cette raison, la comparaison avec les données concernant d'autres périodes publiées dans des Annuaires précédents peut ne pas fournir une indication valable de l'évolution réelle de la consommation.

Les données de ce tableau ont été élaborées à partir de la Banque de données statistiques de la FAO. Pour établir les bilans on a utilisé les données disponibles en août 1994. C'est pourquoi dans certains cas il peut y avoir des différences avec les données de capture et de commerce publiées dans la dernière édition des Annuaires statistiques des pêches de la FAO, qui contiennent des informations fournies plus récemment.

Pour des renseignements détaillés sur les autres produits alimentaires et sur le rôle du poisson dans l'alimentation nationale voir:

NOTA

Los datos de capturas, de comercio y de suministro se refieren a pescado, crustáceos y moluscos, incluidos todos los organismos acuáticos, excepto las ballenas y algas marinas.

Los cambios en las existencias están disponibles sólo para un número limitado de países.

En vista de las posibles distorsiones que puede sufrir cada uno de los componentes del balance de productos (por ejemplo, los datos sobre capturas, comercio y población) así como los coeficientes utilizados para convertir el peso del producto en el peso en vivo, deberá considerarse que los datos del consumo por habitante son solamente un índice del orden de magnitud de los niveles de consumo. Por consiguiente, la comparación con los datos para los períodos previos publicados en anteriores Anuarios puede no constituir una indicación válida de los cambios reales experimentados en el consumo.

Los datos de este cuadro han sido procesados del Banco de datos de la FAO. Para calcular los balances se han utilizado los datos disponibles en agosto 1994. Por esta razón en algunos casos se pueden encontrar diferencias con los datos de captura y de comercio publicados en la última edición de los Anuarios Estadísticos de Pesca de la FAO, que contienen datos obtenidos más recientemente.

Countries are arranged by the average value of trade in the period 1984-93. World totals for selected fishery commodities may be understated due to statistics being reported as commodity aggregates in some national trade statistics. This results also in imbalance between figures for world imports and exports of given commodities.

With the introduction of a more detailed trade classification in many countries, statistics for 1988-1993 for certain commodities are not comparable with those of previous years.

Les pays sont répartis selon la valeur moyenne du commerce dans la période 1984-93. Les totaux mondiaux des produits de la pêche choisis peuvent être sousestimés à cause du fait que les statistiques sont reportées à niveau moin détaillé dans quelques systèmes statistiques nationaux de commerce extérieur. Cela aboutit aussi à des différences entre le total mondial des importations et celui des exportations pour le même groupe de produits.

Suite à l'introduction d'une classification de commerce plus détaillée dans plusieurs pays, les statistiques de 1988-93 pour quelques produits ne sont pas comparables avec celles des années précédentes.

Los países están clasificados según el valor promedio del comercio en el período 1984-93. Los totales mundiales de los productos pesqueros escogidos pueden ser subestimados debido a que las estadísticas son presentadas a un nivel menos detallado en algunos sistemas estadísticos nacionales de comercio exterior. Como consecuencia, también los totales mundiales de las importaciones y de las exportaciones para la misma agrupación de productos no coinciden.

Con la introducción de una clasificación de comercio más detallada en muchos países, las estadísticas de 1988-93 para algunos productos no son comparables con aquellas de los años precedentes.

(*) Excluding aquaculture production.

World value of landings estimated on the basis of national prices received by fishermen. Price information is available for a limited number of countries only.

(a) Due to the difficulty of identifying the quantities of species used as raw material destined to the manufacture of meal and oil, quantities indicated are not exhaustive and differ from those of table A1 - Disposition of world catch. A minor proportion of the quantities shown under items may also be used in the manufacture of meal and oil.

(*) Non compris la production aquacole.

La valeur des débarquements est estimée sur la base des prix nationaux payés aux pêcheurs. Les informations concernant les prix ne sont disponibles que pour quelques pays seulement.

(a) Comme il est difficile d'identifier les quantités de chaque espèce employées comme matière première pour la fabrication de farines et huiles, les quantités indiquées ne sont pas exhaustives et diffèrent de celles figurant au tableau A1 - Utilisation des captures. Une certaine proportion des quantités indiquées sous d'autres rubriques peut aussi être utilisée dans la fabrication des farines et huiles.

(*) Se excluye la producción aquícola.

Valor de los desembarques estimado basandose en los precios nacionales pagados a los pescadores. Se dispone de estos precios para algunos países solamente.

(a) Debido a la dificultad de una correcta indentificación del volumen de cada especie utilizado en la fabricación de harina y aceite, las cantidades indicadas no son exhaustivas y difieren de las del cuadro A1 - Utilización de las capturas. Una proporción de las capturas indicadas bajo otros rubros puede utilizarse para la fabricación de harina y aceite.

Les exportations figurant dans les publications nationales sur le commerce ne comprennent pas les quantités débarquées dans des ports étrangers par des navires du Royaume-Uni. Dans le présent Volume les exportations ont été ajustées de manière à inclure ces quantités.

Las exportaciones que se dan en las publicaciones nacionales correspondientes a comercio excluyen los desembarques en puertos extranjeros por embarcaciones del Reino Unido. Es este Volumen se han ajustado las exportaciones para incluir esas cantidades.

From 1991 data on processed products estimated on basis of trade data and information appearing in Scottish Sea Fishery Tables; data may exclude some commodities produced in England and Wales.

A partir de 1991 les données concernant les produits transformés sont des estimations faites sur la base des données de commerce et information publiée dans les Scottish Sea Fishery Tables; les données peuvent ne pas comprendre certaines denrées produites en Angleterre et dans le Pays de Galles.

Desde 1991 los datos relativos a productos elaborados se han estimado sobre la base de los datos de comercio y la información que aparece en Scottish Sea Fishery Tables; los datos pueden excluir algunos productos fabricados en Inglaterra y Gales.

## Notes on individual countries or areas

## Notes sur divers pays ou zones

## Notas sobre los distintos países o áreas

### USA

Includes data for Puerto Rico.

Les données qui ont trait à Porto Rico sont comprises.

Se incluyen los datos correspondientes a Puerto Rico.

Until 1991 US export data in this Volume include quantities transshipped from US flag vessels to foreign vessels under joint venture agreements. These transshipments, which are excluded from official US trade data, ceased in 1992.

Jusqu'en 1991 les données relatives aux exportations des Etats-Unis figurant dans ce Volume comprennent des quantités transbordées en mer sur des navires étrangers sous régime de sociétés mixtes. Ces transbordements, qui ne sont pas compris dans les statistiques officielles du commerce des Etats-Unis, se sont arrêtés en 1992.

Hasta 1991 los datos de exportación relativos a Estado Unidos de América en este Volumen incluyen el pescado capturado por embarcaciones del pabellón nacional y transbordado en mar en embarcaciones extranjeras que faenan mediante un contrato de empresa conjunta. Estos transbordos que no están incluidos en las estadísticas oficiales de comercio de los Estados Unidos de América, cesaron en 1992.

### AREA OF THE FORMER USSR

In 1991, the Union of Soviet Socialist Republics formally dissolved into 15 individual countries (Armenia, Azerbaijan, Belarus, Estonia, Georgia, Kazakhstan, Kyrgyzstan, Latvia, Lithuania, Republic of Moldova, Russian Federation, Tajikistan, Turkmenistan, Ukraine and Uzbekistan). Whenever possible, data are shown for individual countries. Otherwise, data are shown for the former USSR area.

En 1991, l'Union des républiques socialistes soviétiques s'est séparée en 15 pays distincts (Arménie, Azerbaïdjan, Bélarus, Estonie, Géorgie, Kazakhstan, Kirghizistan, Lettonie, Lituanie, la République de Moldova, Fédération de Russie, Tadjikistan, Turkménistan, Ukraine, Ouzbékistan). Les données sont présentées pour ces pays pris séparément quand cela est possible. Autrement, les données sont présentées pour l'ancienne zone de l'URSS.

En 1991, la Unión de las Repúblicas Socialistas Soviéticas se ha dividido en 15 países distintos (Armenia, Azerbaiyán, Belarús, Estonia, Georgia, Kazajstán, Kirguistán, Letonia, Lituania, República de Moldova, Federación de Rusia, Tayikistán, Turkmenistán, Ucrania, Uzbekistán). Cuando es posible, se presentan los datos relativos a cada país. De lo contrario, se presentan los relativos al área de la ex URSS.

### YEMEN

Previously Yemen Arab Republic, Yemen Democratic.

Anciennement République arabe du Yémen, Yémen démocratique.

Antes República Arabe del Yemen, Yemen Democrático.

### YUGOSLAV SFR

Until 1991 data refer to the Socialist Federal Republic of Yugoslavia, composed of six republics.

Jusqu'en 1991 les données se rapportent à la République fédérative socialiste de Yougoslavie, qui était composée de six républiques.

Hasta 1991 los datos se refieren a la República federal socialista de Yugoslavia, que estaba compuesta de seis repúblicas.

### VENEZUELA

Data in national publications on exports do not include landings of Venezuelan fishing craft in foreign ports. However, the exports in this Volume have been adjusted to include these quantities.

Les données figurant dans les publications nationales relatives aux exportations ne comprennent pas les mises à terre des navires de pêche vénézuéliens dans les ports étrangers. Toutefois, dans le présent Volume, les exportations ont été ajustées de manière à inclure ces quantités.

Los datos de exportación que se dan en las publicaciones nacionales no incluyen el pescado descargado por embarcaciones venezolanas en puertos extranjeros. En este Volumen, sin embargo, se han ajustado las exportaciones para incluir esas cantidades.

The *FAO Yearbook of Fishery Statistics – Commodities* is a compilation of annual statistical data on production and foreign trade of fishery commodities for all countries and territories of the world. The yearbook includes data series on quantity of production of processed and preserved fishery products and on quantity and value of imports and exports of fishery products. It also gives statistics for apparent consumption of fish and fishery products, the value of world catches and their disposition. Statistical information in the yearbook is based primarily on data provided by the countries through questionnaires or official publications. In the absence of official data, FAO makes estimates based on the best information available.

L'*Annuaire statistique des pêches - Produits* de la FAO est un recueil de données statistiques annuelles sur la production et le commerce international des produits de la pêche pour tous les pays et territoires du monde. Les données concement le volume de la production des produits de la pêche traités et conservés, le volume et la valeur des importations et des exportations des produits halieutiques. L'annuaire fournit également des statistiques de la consommation apparente de poisson et produits de la pêche, la valeur des captures mondiales et leur utilisation. Les données sont basées essentiellement sur les renseignements fournis par les pays en réponse à des questionnaires qui parviennent à la FAO ou sur des publications statistiques officielles. Lorsque ces renseignements font défaut, la FAO procède à des estimations à partir des meilleures informations dont elle dispose.

El *Anuario estadístico de pesca – Productos* de la FAO es un compendio de datos estadísticos anuales sobre la producción y el comercio internacional de productos pesqueros para todos los países y territorios del mundo. Se presentan datos sobre la producción de productos pesqueros elaborados y conservados y las cantidades y valores de las importaciones y exportaciones de los productos. El Anuario publica también estadísticas del consumo aparente de pescado y productos pesqueros, del valor de las capturas mundiales y de su utilización. Los datos estadísticos se basan sobre todo en la información que los países proporcionan a la FAO a través de cuestionarios o de publicaciones estadísticas oficiales. Cuando no se dispone de esta información, la FAO realiza estimaciones utilizando los mejores datos en su poder.
